

Ultracleansterile transfer solutions

FOR THE GLOBAL BIOPHARMACEUTICAL INDUSTRY

Your partner for ultraclean sterile transfer solutions in the global pharmaceutical industry

Co-development with pharma to better address unmet needs

ABC Transfer has been created by aseptic industry experts in co-development with pharma and isolator companies. This collaboration began with conducting a feasibility study which revealed more than 50 opportunities for improvement in Rapid Transfer Systems: GMP compliance, ease of cleaning, sterility assurance and ultra-cleanliness, lifecycle cost, maintenance, ergonomics, productivity, health and safety in production and social and environmental impacts, amongst others.

A global team of experts in pharma transfer systems

Thierry Girard

Thierry has 30 years' experience as an executive in mid-size industrial companies, including the pharmaceutical and medical device sectors, and managing complex international B2B relationships.

Jean-Luc Schneider

Jean-Luc has 25 years' experience as Product Manager, Design Office Manager and Industrial organization Manager.

Both Thierry and Jean-Luc have worked for the market leader of transfer technology in Vendôme (France). Thierry as President and Sales Manager for over 5 years and Jean-Luc as R&D Manager.

They have strong knowledges and background in the pharmaceutical industry and have complementary competencies (expertise) allowing them to structure the business development in the best conditions. Our new products are designed from scratch with the reference market but are compatible to the different RTP in the sector.

Aurélie Mortier Pharmacist

Quality manager
Validation manager
15 years experience

Julien Félix Product Manager

15 years experience

Pierre Legeais Plastics Engineer

Single used bag
and seal expert
5 years experience

Marie-Claire Brizions Accountant HR Manager

30 years experience

Cécile Gonsard Sales and Marketing

25 years experience
in Customer Service,
fluent in French,
English, German and
Italian

9 GMP industrial partners on resolving 60 shortcomings.

Designed from scratch, the ABC Transfer system is the very first of its kind to satisfy all the demands in RTS for biopharmaceutical manufacturing.

- Additive manufacturing, prototypes in small and medium series
- Realizations in 3D printers
- Design office specialized in plastics and eco-design
- Conception of pharmaceutical products
- Intellectual property Consulting Firm

■ Strong financial backings

- Strong financial backing from professional private equity investors like Go Capital
- Powerful backing from BPI France French government
- Financial backing from the local council Centre Val-de-Loire Region And Tours Metropole (big Area of TOURS city)

GO CAPITAL **bpi**france

“

We have developed a range of high-quality Rapid Transfer Systems (RTS) solutions in collaboration with pharma and isolator companies. Patient safety, increased regulation, vital requirements for manufacturing new generation pharmaceutical drugs (cell therapy, nanopowders, new anticancer, etc.), automatization, plus other trends are among the many challenges the pharmaceutical industry has to address.

”

Thierry Girard & Jean-Luc Schneider

A complete range of aseptic transfer systems to improve pharma processes

**cGMP design, ergonomics and regulatory compliance,
a powerful & complete transfer system**

The complete ABC Transfer® System is designed to power up rapid transfers in pharmaceutical filling lines.

- Minimal operations inside isolators thanks to external opening
- Easy integration on double wall isolators
- Class 1 transfer system (ISO 10648)
- Validated alpha and beta connections

- Reduced ring of concern
- Features the EasyGlide™ seals
- Modular design for simplified maintenance
- Reduced weight for easier handling

- Compatible with most RTP Brands
- A complete range of handling accessories
- A complete range of single use beta products

The ABC Transfer brand

60 identified opportunities for improvement

- GMP compliance, patient safety
- GMP compliance, Ultra-cleanliness
- Ergonomy, Operations
- Ergonomy, Maintenance
- Industry responsibility, continuity of supply
- Environmental Responsibility, raw materials consumption
- Social Responsibility, endocrine perturbator

A brand for sterile processes

- GMP & USP Class 6 compliance
- Ultracleanliness & Performance
- Ergonomy and risk reduction
- Future proof design
- Environmental and Social responsibility

Environnemental & Social responsibility

From design to recycling, we prioritize lowering the environmental impact of our products:

- No Bisphenols and no Phtalates in our single-use ported bags
- 30% fewer plastics
- 30% less stainless steel
- All our products are 100% recyclable

Fighting global warming by offsetting our carbon footprint

More can be done to reduce our impact on the environment. ABC Transfer has subscribed to an environmental program, Reforest'Action, to compensate for our residual carbon emissions. That program is executed in France and its timely implementation is permanently controlled.
