Digitalizing your QC, QA and R&D Operations with Binocs

DEMAND VISIBILITY

PLANNING ADHERENCE

WORK EFFICIENCY

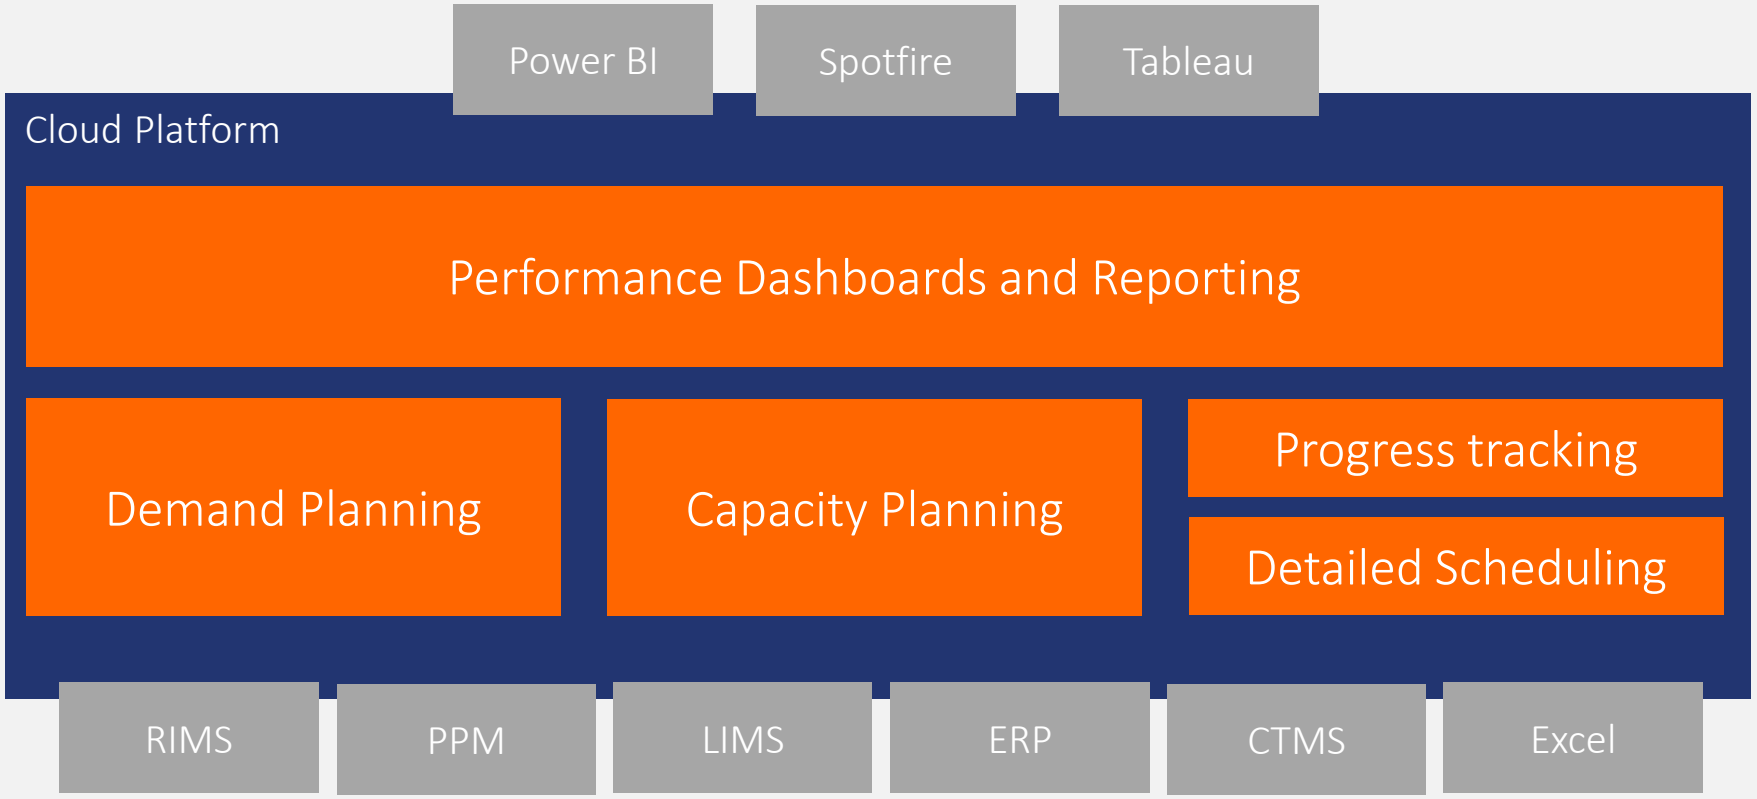
EMPLOYEE RETENTION

BINOCS is a leading Planning and Performance cloud solution for organizations that rely on engaged knowledge workers to deliver on strict timelines.

More than 800 teams worldwide in areas such as QC Labs, QA, R&D, clinical operations, regulatory affairs and cell & gene therapy production have **abandoned their Excel Sheets** and use BINOCS to digitalize their operations.

A Modular and Scalable Architecture

- Plan organizations with 10...100...1,000 scientists, analysts, engineers
- Binocs is accessible from everywhere around the globe.
- Integrate your outsourcing partners



CERTIFIED ISO/IEC 27001

Why leading brands selected BINOCS

- Generate **work demand patterns fully automatically** using machine learning
- Apply work **standardization** and **campaigning** to optimize **efficiency**
- An intelligent **planning algorithm** taking into account **competence constraints**
- Powerful **what-if scenario analysis** for all users
- Actual and past KPIs, but also **projected future KPIs** let you **act up front**

innovation delivered

BCG

nibrt

The leading strategy consultant BCG and the nibrt University showcase Binocs in their Innovation Center for Operations in Bio-Pharma in Dublin.

GARTNER is the world's largest industry watcher and positions BINOCS as a key enabler for the LAB OF THE FUTURE
...and named us cool vendor.

BINOCS in Laboratories

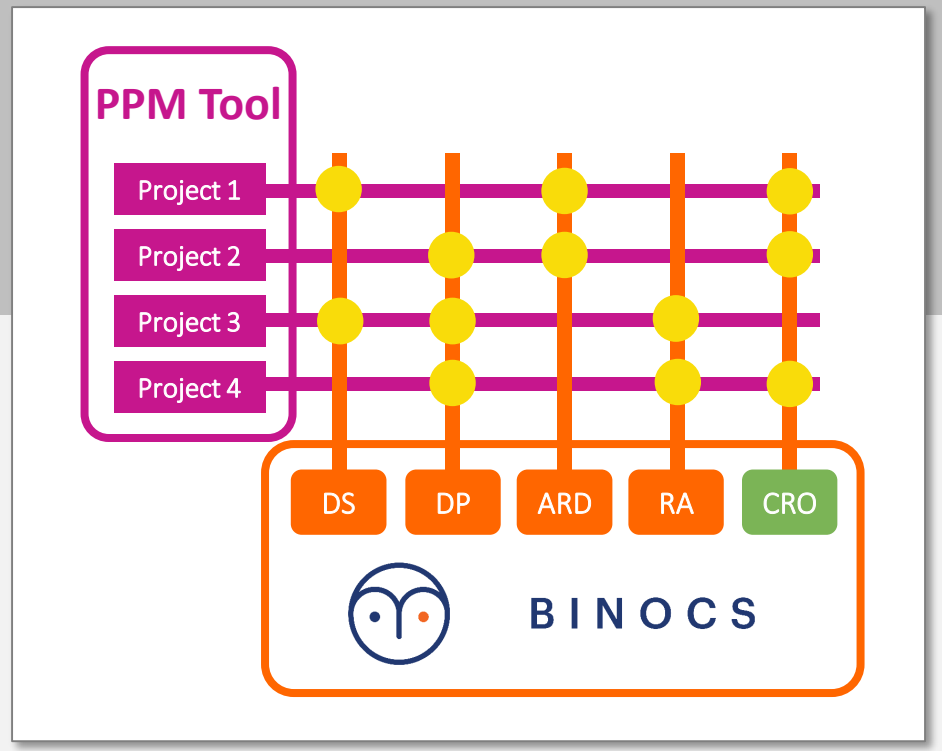
- Capture long term lab demand from supply chain planning or ERP
- Capture short term demand from LIMS
- Schedule analysts and instruments
- Intelligent sample campaigning
- Lab performance dashboards
- Digital lean lab

> Automatic scheduling improved our Service Level with more than 25%.

BINOCS in R&D

- BINOCS brings the tools that resource managers in R&D functions need
- BINOCS integrates with Project Portfolio Management (PPM) solutions
- Cover the full resource capacity picture of the R&D function, not just the projects
- Competence-based resource leveling: the project milestones are leading, BINOCS will find a resource solution

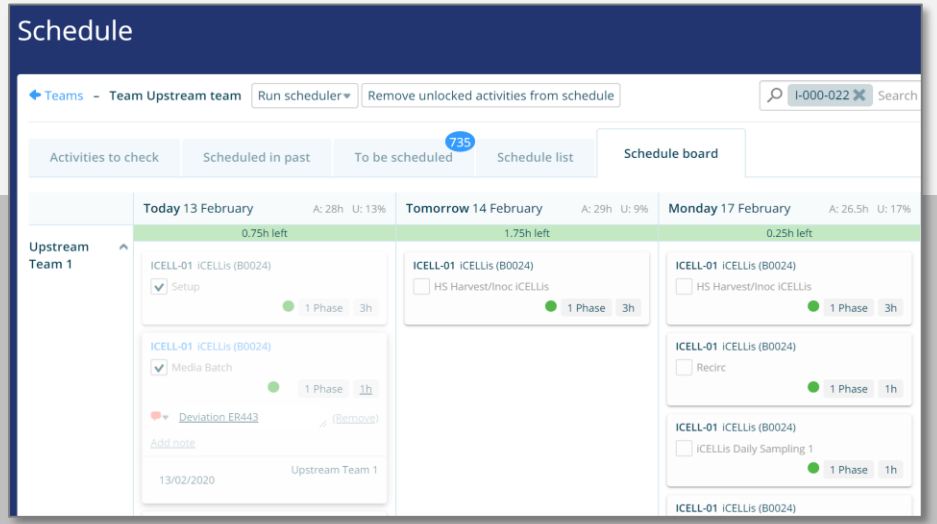
> BINOCS was the missing piece that enabled the value of Planisware in R&D

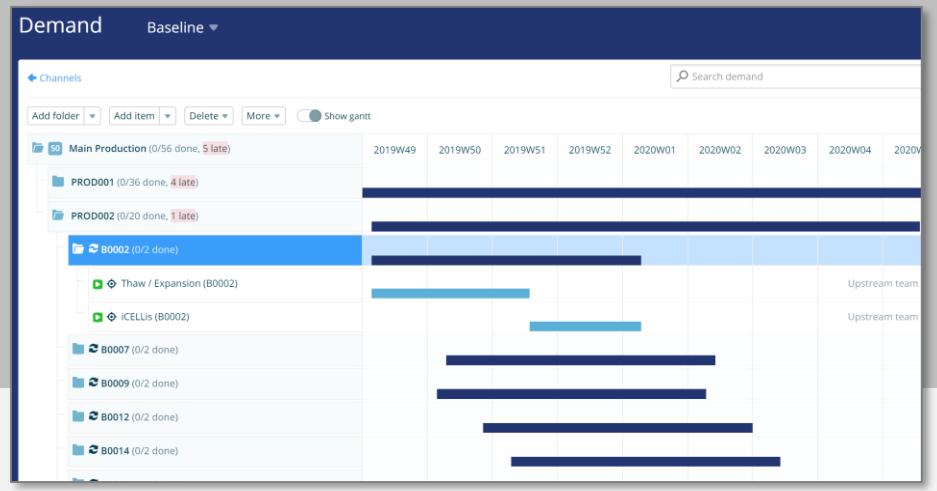


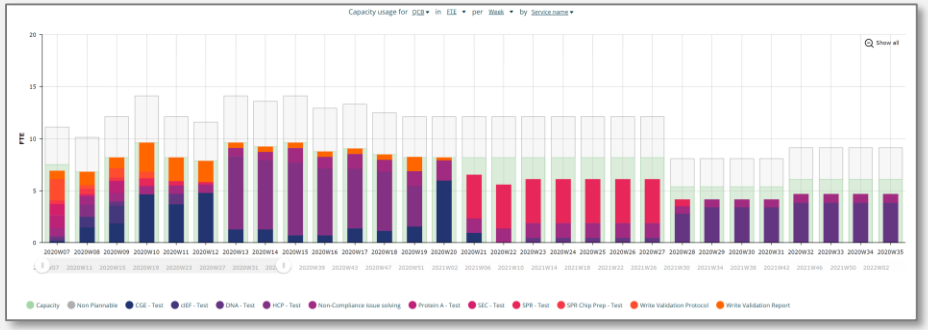
BINOCS in CGT

- Handle the close interaction between scientists and equipment
- Integration of production, QC and QA activities
- Re-schedule the CGT operations on the fly when priorities change
- Handle bioreactor allocation and reservation
- Handle the mix of clinical and commercial patient batches

> BINOCS is the only solution that can plan our end-to-end Cell & Gene Therapy supply chain







BINOCS in Regulatory Affairs

- Collect all regulatory demand into a “one version of the truth” data lake
- Implement a lean Operating Model for all submission types
- Generate end-to-end work for all RA functions such as CMC, Labeling, Clinical and Publishing
- Connect global and local RA teams
- Integrate CROs

> In two years we increased our submission due date adherence with 50%
