High Specification Cleanroom Systems

Global specialists in the manufacture and delivery of FM approved, high specification cleanroom systems which meet all ISO 14644 Classifications.

[www.puracore.com](http://www.puracore.com)

## Leading manufacturers of complete cleanroom systems

- Fully flush cleanroom solutions
- Easy to install, modular components
- Panels to match your colour requirements
- Suitable for all ISO 14644 classes
- Cleanrooms available in a range of finishes:
  - PVC white foodsafe laminate
  - PET
  - Stainless steel
  - Painted aluminium
- Panels available with a range of cores:
  - Aluminium honeycomb - high specification, non shedding, lightweight and high strength
  - PIR - lightweight
  - Mineral fibre - fire safe

Puracore® is the leading specialist cleanroom product range from Gilcrest Manufacturing UK. Puracore® has over 20 years 'hands-on' experience in manufacturing and supplying flush cleanroom systems with a number of approved installation partners.

We offer a full range of FM approved cleanroom components including walls, ceilings, vision panels, doors and ancillaries.

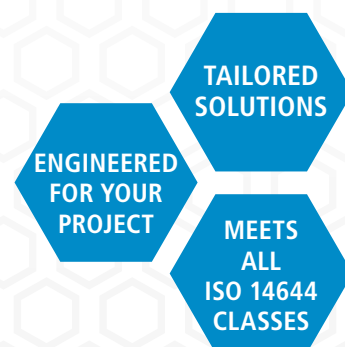

## Engineered for you to customise your perfect individual solution for a wide range of projects

- Range of wall panel systems:
  - 50mm modular cleanroom panel
  - 17.5mm cleanroom lining system
  - 10mm cleanroom liner panels
- Ceiling systems:
  - 50mm walk on ceiling
  - 65mm high load ceiling
  - Grid ceiling, available as standard or walk-on
  - Hidden ceiling hanger system
- Custom made to order

## State of the art cleanroom components

- Accessories include:
  - A range of doors including flush doors and rapid rise
  - Flush and clamp frame windows
  - Coving
  - Conduit panels
  - Raceway panels
  - Preformed corners
  - Air returns
- Constant research and development into new cleanroom components and technologies
- All components and apertures are pre-cut and delivered to site ready for installation

Unique Puracore® components provide the highest specification of cleanroom.

Puracore® is led by the 50mm FM approved, aluminium honeycomb core cleanroom panel. Its core delivers a strong but lightweight panel, which offers mechanical stability, excellent flatness and most importantly for cleanroom environments, non-shedding properties.

This is why Puracore® has been selected by industry leaders all over the world including GSK, Pfizer, Rolls-Royce, Astra Zeneca and Merck.

We can offer exclusive components and panels to provide completely flush, high end and aesthetically pleasing cleanroom builds.

All Puracore® components are tailored to each project, manufactured to order, with pre-cut apertures and delivered to site ready for install. No on-site cutting is required saving time, money and which allows for clean and efficient installation.

## Cleanrooms for small laboratories to large scale manufacturing

- In-house cleanroom experts and technical support team
- Installation and design partners worldwide
- Personalised service for every project, from start to finish

Experienced team  
dedicated to  
providing cleanroom  
solutions for any  
application  
and industry

The Puracore® technical team have over 20 years' experience in cleanroom supply and technical support. With the skills to work with large scale drawings that contain every detail of the cleanroom, whilst illustrating exactly where joints, special panels and apertures are required.

Puracore® supply products to every unique project. We also offer a personalised service to overcome any problems met in design and construction and to provide a solution for this. As a result there is constant development to our cleanroom products.
