

SILICONE ELASTOMER GEL IN RENEWABLE HEMISQUALANE CARRIER

Silicone elastomer gels have demonstrated far-reaching benefits in cosmetics and are most notably recognized for the premium feel that they provide. Traditional offerings utilize cyclomethicone or silicone fluid carriers. Silmer® Sustain-H brings biobased sustainable formulating within reach, providing elastomer gel benefits dispersed in a renewable hemisqualane diluent!

- ✦ Imparts cushion and emolliency
- ✦ Thickener for anhydrous W/O, W/Si formulas
- ✦ Provides uniform powder dispersion, SPF boost
- ✦ Extended playtime with smooth after-feel
- ✦ Recommended use levels from 1-20%
